

Q: Why should I carry Oxygenetix?

A: Oxygenetix is the only oxygen treatment, air permeable make-up on the market. It will make your patients look great while they are recovering. It promotes healing & keeps skin looking young and beautiful.

Q: Can people with sensitive skin use Oxygenetix?

A: Oxygenetix is safe for every skin type; including post procedural and sensitive skin. It soothes and promotes healing of skin and doesn't irritate or cause break-outs.

Q: Has Oxygenetix been tested?

A: Yes, Oxygenetix has been tested by physicians and their patients.

Q: What is Ceravitae? What does it do?

A: Ceravitae does the "heavy lifting" when it comes to proliferating young, fresh and plump skin cells, by delivering high amounts of oxygen. This aerobic effect helps to make those vital productive cells work harder.

Q: What procedures can Oxygenetix be used after?

A: Oxygenetix can be used after: CO2 Laser - Rhinoplasty - Laser Hair Removal - Acne/Rosacea Treatments - Facial Surgery Bruising - Scar Revision - Skin Resurfacing - Injectables - Eye Surgery - Dermabrasion - Chemical Peels.

Q: Can Oxygenetix be used as an everyday make-up?

A: Yes, Oxygenetix was formulated for post-operative healing and full, undetectable coverage, continued use promotes youthful, healthy skin through oxygen driven cellular turnover in a breathable, second skin formula.

Q: Is Oxygenetix good for your skin?

A: Oxygenetix is great skin care that just happens to be a make-up foundation.

Q: What are the differences between Oxygenetix and Lycogel?

A: Formulator and product designer, Barry Knapp, created both products. Lycogel was ground breaking and proved to be a huge success when brought to market back in 2001.

Mr. Knapp parted ways with Lycogel when the company changed his original formula simply to lower production costs without consideration of the benefits the removed ingredients had provided. Today Mr. Knapp introduces Oxygenetix, the culmination of his years of research and listening to doctor and patient input.

Oxygenetix takes the category to a whole new level of providing relief and helping patients look and feel better, even before leaving the doctors office It's continued use promotes youthful healthy skin, and provides breathable flawless coverage for all skin types.
